

Case Study:

On-Demand Staffing

CDI places highly-skilled professionals for superior customer service.

Client Description:

A premier energy company serving the Southeast United States.

Situation:

The client required a large number of contingent and direct hire highly-skilled professionals including GIS AutoCAD technicians, designers and engineers as well as a ready pool of field technicians.

CDI Solution:

As a tier one supplier to the client for over 15 years, CDI supplied hundreds of contingent and direct hire employees to the client's two divisions. CDI implemented a program to manage more than 60 GIS technicians and over 15 field technicians that performed work on projects within the specified guidelines. A smaller task team was also established at the client's other division.

Results:

As a service provider to over 35 million customers, businesses and industries, the client maintains one of the highest reliability records in the nation. The CDI partnership provides an important element to this success, with CDI placed professionals executing projects on time and within budget.
